

Introduction

An enthusiastic, well rounded professional with current focus on Astronomy and Astrophysics. This leverages my prior work as a "**big data**" IT professional using Oracle products for large-scale DOD clients.

My work since my youth and the past 7 years asserts my interests in Astronomy, especially large repositories, archives and data releases of current-day missions.

**10/21 – Present Advanced Astronomy & Astrophysics education and related work****Online coursework in Artificial Intelligence AI, Machine Learning ML, Astronomy and Physics, Dallas, TX (11/21 – present)**

- Online **AI** and **ML** coursework from Stanford.
- Mechanical Universe, Feynman lectures, Physics, Astrophysics paid-for online courses.
- DASCH (Digital Access to Sky Century at Harvard) online tutorial and exercises.

AAS(American Astronomical Society) membership and participation, Dallas, TX (11/21 – present)

- Attended 5 AAS meetings since 2019, fully enjoying separate tutorial technical sessions with Python and Jupyter notebooks.

- Attended dozens of plenary speeches and breakout presentations over the 5 days of each conference.

DASCH project involvement (Digital Access to Sky Century at Harvard), Dallas, TX (11/21 – present)

- Started out as a citizen scientist transcribing the old Harvard College Observatory logbooks. Got to know Professor Josh Grinlay and his DASCH team.....very good people.
- Advanced to learning the DASCH runtime environment, interacting with the DASCH 110 years of digitized data from plate scans.
- Provided feedback to development/support team for refinements and UI issues.

Orientation on variety of online archives/repositories of astro-data, Dallas, TX (11/21 – present)

- Archives: **Hubble, SDSS, WISE, 2MASS**; consumed tutorials and learned archive interfaces using TAP.
- Enrolled and attended AAS tutorial seminars that employed Python and Jupyter notebooks to teach interfaces to various online archives.
- These activities further leveraged my prior IT career in "big data".

LSST Community Forum (Rubin Observatory), Dallas, TX (11/21 – present)

- Leveraged IT experience to download/install/debug and use various releases of the LSST pipeline software.
- Learned all the steps of the pipeline and how to customize steps for specific purposes.
- Interacted online with the Community Forum support team.
- Attended 3 annual LSST Community Forum workshops, virtually (COVID) and in Tucson, AZ.
- Drafted and contributed a formal Relational Database Entity Relationship Diagram depicting the database structure underneath the LSST pipeline processing. Classic IT DBMS habits die hard....

Colorado University AstroPhysical and Planetary Sciences, Boulder, CO (08/22 – present)

- Commuted to Boulder from Dallas to audit 24+ courses listed in Appendix A.
- Attended several courses virtually and inabsentia (summer semesters).
- Scope ranged from intro 2000-level to 5000-level.
- Refer to Appendix A.

08/94 – 10/21 IT projects and assignments**Consulting assignment @ Blackstone, Inc., G6 Hospitality, Dallas, TX (07/13 – 10/21)-Oracle APPS DBA**

- 11i to 12i upgrade of full eBusiness suite Financials.
- Addressed Information Assurance [IA] vulnerabilities on all system components to harden environment against credit card fraud and PII exposures.
- 24X7 support for production 12i environments and OBIE Data Warehouse, development and test.

Consulting assignment @ U.S. Navy SPAWARS, Charleston, SC (10/12 – 07/13) 9 months-Oracle APPS DBA

- Supported development for next-generation Global Combat Support System [GCSS]. Architecture included R11i EBS, R12i EBS, Infrastructure/OID/SSO, SOA and Grid Control at Carpathia IT center.
- Addressed Information Assurance [IA] vulnerabilities on all system components.
- Covered normal e-Business Suite applications DBA roles, including patching, cloning, upgrades, backups, testing and performance/problem resolutions.

Consulting assignment @ U.S. Marine Corps, Camp Pendleton, CA (02/12 -10/12) 9 months-Oracle APPS DBA

- Supported development for next-generation Marine Combat Support System. Architecture included R11i EBS, R12i EBS, Infrastructure/OID/SSO, SOA, Grid Control and data conversions/loads.
- Implemented/documented Information Assurance [IA] mandates on all system components.
- Direct support to Marine Core as DBA - Functional and Technical Service Representative.

Consulting assignment@U.S. Air Force,Wright Patt. AF Base, Dayton,OH(03/10 – 02/12)-Oracle APPS DBA

- Supported largescale development for next-generation Air Force logistics system, Expeditionary Combat Support System [ECSS].
- Architecture included R12i EBS, Infrastructure/OID/SSO, SOA, Grid Control and data conversions/loads.
- Covered normal e-Business Suite applications DBA roles, including patching, cloning, upgrades, backups, testing and performance/problem resolutions.
- Responsible for Information Assurance [IA] mandates on all system components.
- Supported development teams with RAC clone refreshes, RAC system builds and full gambit of problem solving and change management migrations.

Consulting assignment @ U.S. Army, Ft. Detrick, MD (03/05 – 03/10)-Oracle APPS DBA

- Converted to 11.5.10 Financials. Supported development for Oracle Projects, Oracle HR and Oracle Collaboration Suite including cloning and system builds.
- Architected/executed platform migration to alternate secure U.S. Army facility for 11i eBiz suite.
- Exercised two trial upgrades from 11i to 12i to document chronology for prime contractor (Deloitte).
- Planned, installed, configured, supported Oracle Collaboration Suite at U.S. Army Medical Research Institute of Infectious Diseases [USAMRIID] for medical/biological content and project repositories.
- Supported Oracle Discoverer Viewer, Discoverer Plus and Discoverer client tools for integration with EBS.
- Granted Top Secret clearance per mandate from DIACAP audit.

Consulting assignment @ Millennium Pharmaceuticals, Boston, MA (01/05 – 03/05)-Oracle APPS DBA

- Upgraded to 11.5.10 Financials, iProcurement, SSWA and custom Report/Form/C++ modules with RAC.
- Executed/documented 3 iterations of the upgrade to 11.5.10.
- Integrated 11i eBusiness with 10gAS Oracle Internet Directory (and MS Windows Active Directory).
- Circulated through on-call team for 24X7 production support of existing Oracle ERP applications.

Consulting assignment @ SAIC U.S. Gov't contractor, New Brunswick, NJ (03/04 – 01/05)-Oracle APPS DBA

- Upgraded to 11.5.10 Financials, Order Management, Projects, iProcurement, SSWA and many custom Reports, Forms, Cobol modules using RAC. Executed/documented 5 iterations of the upgrade to 11.5.9.
- Supported 13 developers, 9 business analysts throughout test phases of 11.5.9 upgrade.
- Supported \$11B U.S. Defense contractor, servicing engineering/admin needs of U.S. military and \$2.3B telecom facility, Telcordia, Inc., [subsidiary of SAIC].

Consulting assignment @ LabOne, Inc., Kansas City, KS (06/03 – 03/04)-Oracle APPS DBA

- Set up medium-scale Dell servers to accommodate reimplementaion of 11.5.10 for Oracle Financials, Order Management, Purchasing and Inventory.
- Conducted 4 test runs of upgrade process and final production upgrade.
- Sorted through myriad of Linux related server and 11i issues.

Consulting assignment @ Agilent Technologies in Colorado Springs, CO (09/02 – 06/03)-Oracle APPS DBA

- End-to-end performance tuning team in support of worlds largest Oracle 11i implementation.
- Follow-the-sun production support of 3 geographies, addressing performance tuning in all areas of the 11i applications deployment.
- Environment included 14 front-end Forms Servers and 3 back-end HP SuperDomes and a user community approaching 4,000 active OLTP users and 99 sets of books.

Consulting assignment @ ABC Distributing in North Miami (02/02 – 09/02)-Oracle APPS DBA

- Responsibility for upgrade scripting, test runs and coordination of 10.7 to 11i upgrade entailing 4 test runs and final live upgrade. Also, built/tested first data warehouse for ABC Distributing for BI and Sales support.

Consulting assignment @ U.S. General Svcs. Admin.[GSA], Washington DC(06/01 – 02/02)-Oracle APPS DBA

- Exclusive responsibility for initial setup of 11i development environment to facilitate upgrade from 10.7 to 11i.
- Products included Oracle HR, Training Administration, Payroll, Advanced Benefits and Self Service Web Applications. 4 other products deployed for demonstration.

Consulting assignment @ Baltimore Gas & Electric (02/01 – 06/01)-Oracle APPS DBA

- Tested upgrade to 11.5.9 for Oracle Projects, Procurement and Financials.
- Supported Price Waterhouse development team.

Consulting assignment @ City Of Jacksonville (11/99 –02/01)-Oracle APPS DBA

- Installed and supported 11.0.3 and 11i Oracle HR, Payroll, Financials Applications
- Executed upgrade from 11.0.3 to 11i and transition from NT to Sun Solaris.

Assorted airline projects @ American Airlines, Inc. (08/94 – 11/99)-Programmer/Analyst, Project Leader

- Full project development cycle for SABRE system airline product development and support

Systems/Software Knowledge:

Oracle Solaris	RedHat Linux	HPUX	ORACLE DBMS	Exadata cert.
Lotus Desktop	MS Windows	MS Office	IBM/AIX	Exalogic cert.

Programming Languages:

Python	SQL/DML	Jupyter NB's	Unix Shell scripting
PL/SQL	PL/1	C Language	

Other:

- Attended **Oracle Open World** conference 11 consecutive years

Education

- Bachelors degree in Computer Sciences at University of West Florida, Pensacola (3.9 GPA).
- 9 hours of graduate computer courses at University of Denver.
- During *consulting assignments* in various cities, I attended night classes in Astrophysics at Rutgers (New Brunswick) and Hood College (Ft. Detrick).
- Commuted to Boulder Colorado to audit 24 ASTR courses at CU Boulder, on campus (Appendix A).

References

- Professional and personal references available separately upon request
